

Adonis.

Victoria Arduino

Art. Luxury. Craftmanship.

The Adonis is ideal for operators that want to combine the beauty of a traditional machine with the ease of operation of a modern automatic machine.

Hand-crafted from premium chrome, the Adonis employs High Extraction Efficiency brewing technology, which produces consistent quality espresso. Its auto steam feature and programmable controls means the quality of each extraction is the same in every cup.

HEE System.

The High Efficiency Extraction System is an innovative brewing system that brings out the nuances of any espresso blend, accompanied by a thick, long-lasting crema.

Autosteam.

Enables the operator to steam and foam milk automatically.

Steam Safely.

The 'cool touch' steam wand is thermally insulated for safety and easy to clean, making the Adonis reliable, sanitary and safe.

On-board Computer.

The on-board computer provides full control; shot time function for each espresso, time-saving auto-wash program, on/off settings for energy saving.
