Events
**OFFICIAL
MACHINE**

The champs choice.

The DC Pro has been awarded the official “machine of champions” at the World Coffee Events Championships 2012-2014.

The integrated DC System marks this machine as something special, with form, function and professionalism as priorities.

Multi-Boiler System.

Supports variable settings within each brewing unit.

Direct Temperature Control System.

Allows exact and consistent water temperature control to within 1/10 degree.

Perfect Milk Foam Consistency.

Championship standard Milk Control System with a three-holed steam tip. This is an optional extra that must be specified at time of order.

Grinder Control System.

Ensures automatic adjustment of the grinding and of coffee dose, thanks to the serial connection between the machine and the grinder on demand.

Online Control System.

Controls all machine functionality remotely, regardless of time and location. This is an optional extra that must be specified at time of order.
